STUDIOTECH BELGIUM SA - NV

Studiotech was founded in 1990 and is now established as a leading audiovisual engineering company and manufacturer of digital broadcast solutions. The products supplied by the Belgian company serve customers from SMEs to global multinationals. Core competencies like development, production, sales and services are available in-house. This gives the owner-managed company, the flexibility to make decisions with an eye close to the market and in the best interests of the customers. Studiotech is a household name in the audiovisual market when it comes to professional studio equipment.

We distribute, sell, install, maintain, integrate and build complete concepts for audiovisual set-ups. Our experience and co-operation with leading manufacturers, suppliers and partners guarantee "best in class" products and solutions for our customers.

Studiotech is active throughout Europe, the Middle East and Africa with established offices in Brussels, Budapest, Warsaw, Algiers and Rabat. In a relatively short time, Studiotech in Belgium, Hungary and Poland have become recognised as leading players in the field of audiovisual engineering across Europe.

To better serve our customers in Algeria, Morocco and neighbouring Maghreb countries, we opened branches

in Algiers and Rabat in line with Studiotech successes, involvement and activities in these regions.

Studiotech has participated regularly in exhibitions, open days and road shows in Amsterdam, Paris, Algiers, Brussels and Dubai, and is planning to add Moscow in the foreseeable future.

Studiotech has been investing in R & D for some time and this year has developed for sale its own virtual studio products featuring cost-effective, 3D character generators with combined 3D graphics, video clips, real time graphics rendering, slow motion control, etc. Best suited to live graphics, sports and studio applications.
